

California Proposition 65 statement

Prop 65 is a California voter initiative designed to protect citizens and sources of drinking water from harmful chemicals.

The US State is required to maintain and publish a list of chemicals known to cause cancer, birth defects or other reproductive harm. The list is administered by the Office of Environmental Health Hazard Assessment.

The list contains a wide range of naturally occurring and synthetic chemicals that are known to cause cancer or birth defects or other reproductive harm. These chemicals include additives or ingredients in pesticides, common household products, food, drugs, dyes, or solvents. Listed chemicals may also be used in manufacturing and construction, or they may be by-products of chemical processes.

As a UK based component distributor, Greenway Electronic Products Ltd is committed to meeting regulatory requirements and we work closely with our suppliers to ensure compliance to local regulations. However, we do not supply any products directly to the USA or Canada markets and are therefore not required to declare blanket Proposition 65 conformance.

Individual products can be reviewed for compliance as required. Compliance requests will only be considered prior to purchase order acceptance.
